

Post 4: Making Security Awareness Training Part of Your Culture

Caption: Security Awareness Training is the backbone of a strong cybersecurity culture, and it's not just a one-time thing. Here's how to integrate cybersecurity awareness training into your company culture:

-  Provide regular, ongoing trainings that keeps your team updated on the latest threats
-  Leverage phishing simulations to test and reinforce learning
-  Find a Security Awareness Training Program with comprehensive reporting to track progress and identify areas for improvement

Give your team the tools and knowledge they need to protect your business.
